

Dear Recruiting Manager,

I am glad to have an opportunity to present myself to your company for the position of Software Engineer. I am a Computer Science graduate student with a minor in mathematics, and a cyber security professional certificate from Colorado Mesa University, Grand Junction, Colorado.

As you would see, although I have experience working in cyber security, I am open to work in the fields of database technologies, software engineering, mobile app development or web technologies that involve technologies like C/C++/C#, HTML, JavaScript, Dart, AJAX, Perl, Dot Net platform or anything new.

I also am currently learning about Google technology and products like the Flutter (a mobile app development using Dart language) and java as I will be implementing them in a project very soon.

My software engineering class gave me experience in software development of a project (TrailFund), I have experienced several software aspects such as

- Software Life Cycle Processes
- Requirements Gatherings
- Client Negotiations
- Product Definition Planning
- Application Development.

My academic experience through my courses in Database Design, Advance Programing C# and JavaScript has helped me gain experience and exposure to SQL, C/C++/C#, and JavaScript programing. Furthermore, by taking class such as Calculus III, Differential equations and linear Algebra, I am confident with my knowledge of mathematics and the ability to continue to learn.

I am sure that the combination of my skills and motivation to excel will make me a valuable asset to your organization. I recently graduated on December 11, 2020 and I would be able to join your organization in February 2021 at the earliest. I am ready to relocate anywhere on my own.

I look forward hearing from you. Should you have any questions, you may reach me via phone (9702164077) or via email (Kimlong.seng1998@gmail.com)

Thank you for your time and consideration.

Sincerely,

Kimlong Seng
